

# THE ART OF EDGE BANDINGS

Born to lead the edge  
[www.monguzzibordi.com](http://www.monguzzibordi.com)

## Our history

**Monguzzi brothers founded Monguzzi Srl in 1982, which is a company that today is a point of reference at a national level for the production of edge bandings and profiles for the furniture industry.**

The headquarters are located in Bovisio Masciago, in Bassa Brianza, beating heart of the entrepreneurial tradition of Lombardy, known for its lively productivity.

Our history starts with the resale and the slitting of laminated, melamine and ABS edge bandings. In the following years, the department dedicated to veneers coils was born. At the same time, Monguzzi brothers started selling industrial glues and cleaners for edge banders. In few years, Monguzzi Srl becomes a production company.

**Monguzzi Digital Printing was launched in 2017. It is the technological core of the company and the expression of its creative and innovative spirit.**

Lastly, in 2018 the installation of ABS extrusion lines gave life to Monguzzi Plastics Extrusion.

## Our values

---

**We project edge bandings to satisfy the tastes and the trends of the moment.**

We have the widest list of edge bandings, which makes us proud and competitive on the national and international furniture market.

Most importantly, all the processes and the raw materials respect the environment: the photovoltaic plant and the Forest Stewardship Council (FSC) brand are just two examples of our green mission.

**Our team counts more than 50 people that build the future with passion and efficiency.**

## Why us?

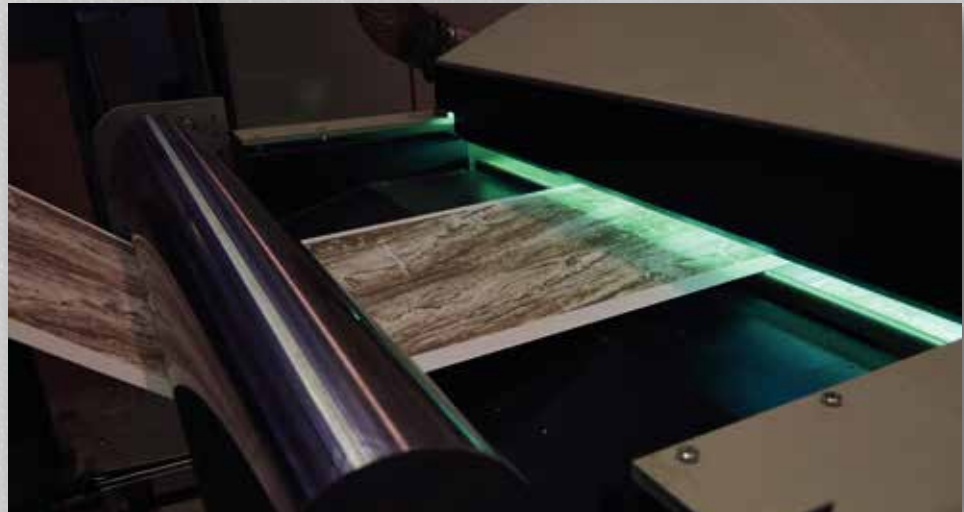

---

**We plan the future with an avant-garde spirit and in the present we support the customer in each stage of production.**

**Punctuality and speed have always been the main characteristics that set us apart from others.**

The edge banding is the detail that gives quality and beauty to a surface, showing the passion we put into realizing.

Some may think beauty is useless, but we give beauty to usefulness instead.

## Our edge bandings

---

The right kind of edge banding gives value to any surface. We have the most comprising range of materials to produce the edge bandings: veneer, ABS, melamine and many more materials.

## veneer edge bandings

**Monguzzi's "classic" edge is born from the passion for real wood.**

Monguzzi realizes bars and rolls of variable length and thickness starting from wood sliced sheets.

The production is able to meet any needs: OSB, end-grain and multiplex edge bandings are some examples.

In addition, Monguzzi offers the service of manufacturing the edge banding with customer material.

## ABS EDGE BANDINGS

**A versatile and ecological material.**

The most refined edge bandings are made of plastic, heat resistant, waterproof and ecological material.

Monguzzi produces ABS edge bandings in solid and wood colors, with different thicknesses and finishes.

Super matte (5 glosses) and super glossy (90 glosses) are the most remarkable.

On demand, it is also available the soft compound particularly suited to coat handles and shaped items.

Today Monguzzi can follow the entire production process thanks to its new ABS extrusion plant.

The accurate selection of the raw materials guarantees the greatest aesthetic quality.

## MONGUZZI DIGITAL PRINTING

**The wide range of edge bandings and materials allows us to meet all our customers' expectations.**

An infinite variety of prints and finishes is now possible to be realized thanks to digital technology.

The trends dictated by furniture industry act as an inspiration to realize more and more aesthetically pleasing products and with an excellent fidelity.

The passion for our work and customer satisfaction drive us to the best result.

## DIGIDOOR

---

**DIGIDOOR is the latest news by MONGUZZI DIGITAL PRINTING.**

Its flexible melamine core makes it suitable for rebated doors.

In addition, the possibility of custom prints makes it ideal for modern and sophisticated environments.

### GLUES AND CLEANERS

---

Monguzzi has been recognized on the market of furniture industry for more than 30 years, also for its large dedication to retailing and technical assistance of glues and cleaners at industrial level for the specific utilization linked to the furniture industry.

## ***Our finishes***

---

The application of a finish to the edge banding is a vital part of the creation of the perfect decor. It gives the final touch to the product, making it as realistic and tridimensional as possible.

## **SEAMLESS TECHNOLOGY**

---

Monguzzi Bordi boasts the innovative seamless technology applied to the edge banding.

The application of a functional layer on the ABS ensures an excellent aesthetic result and a perfect adhesion to the board. The glue line of the edge banding-board system disappears and guarantees a higher resistance to humidity and heat compared to traditional EVA glue edge bandings. Seamless technology is conceived for hot air and laser edge banders and it is only produced for thicknesses equal or greater than 1 mm.
